Imperial Forces

- **Timon Skaard***: Lord-commander of the outpost
- **Lucius Gazarel***: Representative of the Charioteers
- **Moira McKean***: Assistant of lucius, she's an excellent pilot.
- **Imperial Troopers**: The standard forces for colonial settlements. About 30 soldiers control the imperial outpost.

The trick here is to avoid getting to close to the charioteers, because of the key the players have. Gazarel is an intelligent and open-minded man most of the time.

But his second, the treacherous McKean will do everything in her power to satisfy the vengeful and power hungry Killroy leaders of Grail.

2.1.1 The hidden colony

Challenge 1

Only 5 jumpkeys can lead to this world. One for the Emperor, one for House Keddah and three for the Charioteers guild.

As the players will arrive on this world with another jumpkey, they will have to be quiet about where they've found it as the Charioteer, and the Killroys still have a few ears on this system.

Breaking the cog (5004 AD)

In 5004 AD, an incident happened on Verona terraforming engine. The failure caused all water to be removed from the low atmosphere, creating in the same move the deep thick steam cloak that now surrounds Verona and make it look like a tiny gas giant from a distance.

3.1.1 Calm before the Storm

Challenge 1

3.1.2 Sacred Moon

Challenge 1

House Masseri holds Rotunda, the first moon of the fifth planet of the Verona System as an orbital base. It has been established centuries ago and is fully operational. It is here that all operation on the jumpgate are done, by a special mystical/religious order called the Navigators.

3.1.3 Gas Giant

Place Mudworld atmosphere

Challenge 1

From space, Verona appears as a gas giant.

Reaching the Ground

This operation is a really tough one, and will be done only by the best pilots.

- The Cloudstorm can disable all systems at any time if the ships goes through a node (electro magnetical node, source of terrible lightning bolts). A navigation check is needed every hour to avoid one.
- With winds reaching 500 km/h in the middle layer of the atmosphere (between 10% and 70% of the trip), manoeuvre checks are needed every 30 minutes to avoid drifting to a node.
- The upper layer (70% to 71%) is liquid water. If not handled correctly it can be a terrible impact at contact.
- The moons of verona are actually at the 30%, 45% and 69% of the atmosphere. They are obstacle that should be avoided and solid bodies that create gravity wells also.

The best way to reach the ground of Verona is by using an escape pod. House Masseri has a few that had been modified to handle the length of the trip.
